

# Penrith Stadium Project

May 2024

The NSW Government is committed to upgrading the existing Penrith Stadium to meet the current and future social, recreational and sporting needs of Western Sydney.

## Developing a design that meets community needs

Since 2022, the NSW Government has consulted closely with the community to ensure the concept design for the Penrith Stadium reflects local needs.

### What you told us:

Refurbished grandstands with additional seating

More food and beverage outlets

Additional public toilets, including more female toilets

Improvements in technology, such as digital scoreboards, videoboards, sound system and lighting

## Responding to community feedback

A project team of architects, engineers and cost planning experts has been working closely with key stakeholders such as Penrith Panthers and Penrith City Council to design a stadium that aligns with community feedback and delivers value for money.

## The redeveloped stadium aims to enhance fan experience by:

- Redesigning steeper grandstands to maximise seating, so fans are as close to the action as possible and have better sightlines to the field or stage
- Increasing ground capacity to around 25,000
- Remodelling the training field to the west of the stadium for additional open spaces and multipurpose courts
- Improving landscaping for multi-purpose, outdoor community use
- Increasing wheelchair accessible seats by around 500% and wheelchair accessible toilets by 85% to cater to a diverse range of fans
- Adding more food and beverage outlets and amenities to improve service speed
- Installing new scoreboards, sound systems, ribbon boards and upgraded lighting
- Improving security in and out of events with new entries and turnstiles
- Upgrading player facilities for both men's and women's sports teams
- Creating a family-friendly atmosphere that preserves the north and south hills

The project will include the current stadium and training field facing Mulgoa Road. A new perimeter fence will enclose the stadium, while the existing training field will be converted into a warm-up area with community facilities and landscaping.

### Project timeline

### Information in your language

To call us using an interpreter, please call the National Translating and Interpreting Service on 131 450, and ask them to call us on 02 9216 5700. The service provides immediate phone interpreting.

### How to have your say

The project is currently on public exhibition until 25 June as part of the State Significant Development Application (SSDA) approval process.

During this period, we encourage you to view the SSDA documents on the NSW Government Portal and to have your say by making a submission directly to the Department of Planning, Housing and Infrastructure at [planningportal.nsw.gov.au/major-projects/projects/penrith-stadium-refurbishment-0](https://planningportal.nsw.gov.au/major-projects/projects/penrith-stadium-refurbishment-0).
